## Summary

---

I'm a C#/.NET Backend Developer looking for a remote position. Known for being diligent — you can count on me to fully commit to tasks, either delivering a prototype or providing solid reasons why something won't work. I'm adaptable, quick to learn new technologies, and transparent about the progress of my work as well as what resources are needed for success. I look forward to working in a team where we can grow and learn together.

## Employment

---

### C# developer

**Nov 2021 – Apr 2023**

Rosneft

(remote) Krasnodar, Russia

- Developed a Web-API within a micro-service architecture using ASP.NET Core and Oracle Database, which was integrated in corporate resource built on Oracle APEX.
- Engineered a service for handling and generating MS Word documents, reducing application preparation time by more than half for all team members and other stakeholders.
- Designed and implemented configuration mechanisms for all processing stages, providing guidance to colleagues for seamless setup.

### Python developer

**Jun 2021 – Aug 2021**

MedRating

Krasnodar, Russia

- Taught myself Python to implement unit-tests for server-side component of a Django project.

### C# developer

**Dec 2020 – Feb 2021**

Asteg

Krasnodar, Russia

- Revamped the GUI code for an Android application using Xamarin. This helped to unify the design across all supported platforms.

## Education

---

### Kuban State University

**Krasnodar, Russia**

Master's degree in Informational systems and technologies

Sep 2021 – Jul 2023

Bachelor's degree in Informational systems and technologies

Sep 2017 – Jun 2021

## Projects

---

### **The generation service of PDF-files from MS Word templates.**

**Dec 2021 – Apr 2023**

at Rosneft (copyright) and KubSU

C# · .NET Core · ASP.NET Core · XML Schema · PL/SQL

Designed to automatically produce formulaic PDF-files from MS Word templates, leveraging data from a document model. Fully configurable. The corporate database is used as a data source.

## Skills and Technologies

---

- Methodologies: Agile, Code refactoring, OOP, Design patterns, SOLID, Unit-testing, TDD.
- Programming languages: C#, PL/SQL, PL/pgSQL.
- Frameworks: .NET Framework, ASP.NET, .NET Core, WPF.
- Testing: xUnit, Moq.
- Development tools: Visual Studio, Git.
